Key Correct Pro : New features in v1.1

FCP/Motion Support for Key Correct 1.1

Key Correct Pro can be in used in combination with any keyer to soften alpha channels, match foreground and background colors, fix outlines, and clean up noise. This set of 15 plug-ins ensures top-quality results from popular keyers such as Primatte Keyer, Keylight, and Ultimatte.

New to version 1.1, Key Correct supports Final Cut Pro and Motion. **Please refer to the full manual for a detailed description of the individual Key Correct plug-ins.**

– Supported versions of Final Cut Pro: 6.0.1 or greater
– Supported versions of Motion: 3.0.2 or greater

How to apply in Final Cut Pro:

Key Correct Pro is accessed like all filters from within Final Cut Pro 6.0.1 or greater. Make sure that the clip is selected and located in the Viewer window in Final Cut Pro. Key Correct Pro is accessed by selecting "Key Correct Pro" from under the Effects Menu->Video Filters -> Key Correct Pro.

How to apply in Motion:

Key Correct Pro is accessed like all filters within Motion 3.0.2 or greater. Make sure that the clip's layer is selected and Key Correct Pro is accessed by selecting "Key Correct Pro" in the Library->Filters->Key Correct Pro.
